April 3, 2024

MCA Learning Community -

As I am sure you are aware there will be a significant celestial event coming up — the solar eclipse! On April 8, 2024, we are excited that our students and community will have the opportunity to witness this phenomenon firsthand.

Our plan here at school is to make this a great learning experience with our teachers explaining more on this event and how to view the eclipse properly. 8th grade science teacher Jesse Wagner, created the following video that does a great job explaining: https://www.youtube.com/watch?v=RE1BwDRRLss.

As always, our priority is the safety and wellbeing of our students. **With this in mind, our district has decided to dismiss students early on Monday, April 8th.** Dismissal times will be at 12:30pm in the JH-SH building, Pre K at 12:50 and Elementary walkers at 1:15pm with bus student dismissal at 1:20pm.

Thank you,

Pete Cheddar
